

TECHNICAL DATA SHEET

Outdoorlink® SL-4-AC Controller

Outdoorlink® cellular power controllers are designed to remotely manage and control powered assets from one centralized platform. The SL-4-AC controller remotely monitors, reboots, and schedules up to four AC devices through its cloud-based management system.

The SL-4-AC is ideal for managing multiple devices at one location, such as billboard illumination, area lighting, field lighting, large digital displays, and various other electronic devices. Flexible integration is available through an open Application Programming Interface (API).

Technical support is available 24/7 via the US-based support team.
